EU INNOVATION FINANCE FORUM

Unlocking private innovation finance in clean tech and new business models in our buildings to increase EU competitiveness.

Europe needs to **upscale and accelerate innovative solutions** that tackle the most complex, impactful systemic issues holistically. Leveraging private innovation finance is key to boosting Europe's competitiveness, however, large-scale rapid financing of innovation in a heterogenous, long-term oriented and fragmented sector (where there isn't a one-solution-fits-all) bears risks.

The forum aims to:

• Reduce financing risks for innovation in green buildings, materials and services leveraging the Clean Industrial Deal, InnovationFund and InvestEU

The <u>B4PIC Network</u> helps industry to scale up new solutions, products and services aligned with the ambitions of the <u>EU Green Deal</u> and New European Bauhaus.

Who

VC funds, corporate ventures, private philanthropy, business angels, banks, asset managers
